

Website Project Update (2025-07-31)

- Data has now been copied from our current website to the new platform
- An example Sitemap has been created, based on our existing structure (see separate document)
- Confirmation has been received that all legally required AGAR content and policies and procedures will be transferred as part of the original agreement
- Colours for the website will be based on colours found in the Parish Jewel
- A training session has been scheduled for August 30th

Next Steps:

- We still need a high quality image of both the Parish Jewel and its wooden case
- We need good quality images from around the parish, in landscape format, for use on the website
- We need the Communication Working Group to be constituted with one member from each ward in order to help oversee the process of creating the new website
